## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. In light of the arguments submitted on October 21, 2004, the amendment has been entered.

### ***Allowable Subject Matter***

2. Claims 21 and 30-36 are allowed.
3. The following is an examiner's statement of reasons for allowance: This invention deals with a method of soldering an enameled wire comprising irradiating a laser beam to the enameled wire thereby melting and stripping away at least part of the insulating coated layer and soldering the core wire to a soldering portion having an empty space there beneath (claim 21). This invention also deals with a electro-acoustic transducer comprising a coil including an enameled wire, wherein a diaphragm has a magnetic material thereon, a molded resin body, and a terminal for connection to the enameled wire, wherein the molded resin body includes an empty space underneath at least a portion of the soldering portion (claim 30). The above stated claim limitations, in combination with other claim limitations, is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Drawings***

4. The case being allowed, the applicant is required to submit new formal drawings detailing the drawing corrections shown in paper dated July 30, 2003.

### ***Response to Arguments***

5. Applicant's arguments filed October 21, 2004 have been fully considered and they are persuasive. Specifically, the applicant argument that "Not only is the space 26a as shown in Figure 4 not depicted in Figure 7, but nowhere in the original specification is there discussion of an empty space with regard to Figure 7, and in paragraph 39 on page 7 of the original specification, the significance of providing empty space 26a is discussed. There is no empty space in Figure 7 that corresponds to the empty space 26a as shown in Figure 4a. Accordingly, because the empty space as claimed, and shown in Figure 4, is not taught or suggested by the prior art, it is respectfully submitted that claims 24 and 30-36 are allowable", is persuasive and therefore the claims have been allowed.
